

DO NOT expand or increase the percentage of local media one company or it's subsidiaries can own!!! It is already controlled by too few companies. The News is particularly compromised by few owners, you can't get any good, clear news anymore; whether local, national or international. The argument that cable provides options is flawed...I can't afford cable, many people I know can't afford cable. When I go on a trip and stay in a motel with cable, it's all the same garbage as is presented on broadcast, anyway. Why not let them put junk (porn, etc.) on pay-cable for people who want to see that, and require the free (no-cost) broadcast stations to provide REAL services to the American public (who, after all, OWN the public airwaves) such as independent news and informative programming.
